## How to use new type of cutting dies.

Use this stick when you take out small gummies.

You can make your original gummies by combination!

## Recipe

Make sure to wash your hands first!

Prepare a glass of water.

**1** Remove the fork and cutting dies from the outer frame.  
※Be careful with sharp tips of the outer frame.

**2** Put the "gummy powder"(in green bag) in the container with the star mark ☆, and spread the surface out flat, using the fork. Then, put water in containers marked "1", "2", "3", and "みず(water)", using the dropper, up to the limit line inside. Lastly, add "yellow powder"(in yellow bag) in "1", "red powder"(in red bag) in "2", and "blue powder"(in blue bag) in "3", and mix them nicely using the fork. ※Be careful not to spill the water.

Wash clean the fork and the dropper in here with water.

## 3 Make your favorite colors!

Make your favorite colors, combining "yellow liquid", "red liquid", and "blue liquid" you made in the process 2. Use the dropper to suck liquid up to combine them in small round containers.

Have fun mixing and making your favorite colors in here!

## 4 Make Gummies!

Put cutting dies with thin-side bottom, and press it firmly as to it fully covered with powder. Drop your favorite colored liquids slowly and softly on powder inside the cutting dies. Wait for a while until it becomes gummy.

### <How to make gummy nicely.>

- Do not put too much liquid in cutting dies.
- If you put too much liquid in cutting dies, add some "gummy powder".
- After making gummy, try to spread the surface of powder out flat.
- Wait for 1 minute for a small gummy, then remove it softly from the cutting dies.

You can make gummies by free drawing not using cutting dies. Have fun making gummies with your favorite colors and shapes.

Make sure to wash your hands first!

Please do not use mineral water which has high levels of calcium (hard water), because it might be unable to mix well with the powders.
